Harnessing Solar Power

Equivalent to 7 football fields of solar panel arrays

3.85 Mw of clean, dependable renewable energy*

Reduces parks carbon footprint

Stabilize energy costs

Reduced reliance on the traditional power grid

Provides protection against energy price volatility

Investment in a future-proof sustainable solution

*Not all buildings will benefit from solar energysolution

Enhancing Well-Being & Supporting Healthy Communities

FITWEL CERTIFIED
TARGETING:
LEED CERTIFICATION

- 1.4 Km of Bicycle Paths
- 4.7 Km of Walking Paths
- 2.7 Km of Multi-use Path

- 676,748 SF (62,872 M²) of added green space
- 2,262,100 SF (210,156 M²) of Natural & Preserved Green Space

- **Park Space** - includes ping-pong table, pergola, beehive and information map.
- **Plaza** - with rest area overlooking natural heritage.

- Clerestory windows throughout to provide natural light
- Increased thermal insulation in the roof and wall structure, providing energy savings
- Landscaping using drought-tolerant species.

A Nature-First Approach

At James Snow Business Park, we engaged with industry experts to support design and construction efforts that prioritize the environment and biodiversity. Our Natural Heritage System, a cornerstone of our project, is designed to protect, preserve, and enhance the natural environment, ensuring our business park not only thrives now, but contributes to a sustainable future.

This involved restoring a creek corridor and establishing stormwater infrastructure, while also mitigating hazards, removing invasive species and restoring habitat based on a nature-first approach.

With natural features like fish habitats, woodlands, wetlands, wildlife habitats, we ensure a balance between urban development and nature fostering ecological diversity for a sustainable future.

Raptor Poles

Provide perches for predatory birds while hunting for prey.

Rock Piles

Created to provide dens and shelter for smaller mammals, birds, amphibians and reptiles.

Wetlands

Constructed to store and discharge water outside of the channel limits and provide habitat for reptiles and amphibians.

Naturalized Corridor

Constructed with riffles and pools to provide habitat variability for a wide range of life processes for fish.

Location

HIGHLIGHTS

Milton is one of Canada's fastest growing development nodes and is interwoven into the GTA's critical road infrastructure, resulting in a highly skilled and educated labour pool within close proximity to the town.
