Québec provincial regulations (Régie du bâtiment du Québec) require certain boilers and pressure vessels to be inspected and certified on a regular basis e.g. one, two- or four-year cycles. Anchor Risk Solutions Corp. provides a valuable service by helping you comply with these regulations and issues the COI (Certificate of Inspection) for your boiler or pressure vessel on behalf of the insurer.

To help us determine your inspection requirements, please advise if any of the following apply (check off any that apply):

I have Certificates of Inspection from previous years;

and/or these are the boilers/pressure vessels operating on my premises:

HIGH PRESSURE BOILERS WITH: steam over 15 psi*
And: heating surface > 1 m² power greater than 10 kW

LOW PRESSURE BOILERS WITH: steam at 15 psi* or less
And: steam, hot water, thermal fluid: wetted heating surface over 3 m² power greater than 30 kW

HOT WATER BOILERS WITH:
 pressure over 160 psi water temperature > 210°F (99°C) power greater than 60 kW

The following have a maximum allowable working pressure (MAWP) greater than 15 psi and are:

- HYDRO-PNEUMATIC TANKS WITH:
 over 24" (610 mm) in diameter** operating temperatures > 150°F (65°C) volume over 450 L
- CUSHION TANK WITH: over 24" (610 mm) in diameter** pressure over 30 psi (205 kPa)
- HOT WATER STORAGE TANKS or DOMESTIC WATER HEATERS over 24" (610 mm) diameter with:
 operating temperatures over 210°F (99°C) heat input over 120 kW (water heater only)
- AUTOCLAVES, STERILIZERS, HEAT EXCHANGERS over 6" (152 mm) diameter** or 1.5 ft³ (42.5 L) volume
- AMMONIA REFRIGERATION SYSTEMS
- AIR RECEIVERS WITH:
 over 24" (0.61 m) in diameter** operating pressure > 250 psi (1,725 kPa) volume > 23 ft³ (0.651 m³)

Or we;

- have none of the above are not sure and would like to speak to someone

Please forward your response including a contact name and telephone to inspections@anchorr.com.

If you have any questions or concerns, please feel free to contact us.
Anchor Risk Solutions Corporation: 1 York Street, Suite 1400, Toronto, ON M5J 0B6

* MAWP (maximum allowable working pressure) found on the nameplate of the boiler/pressure vessel;
** internal diameter
